We are looking for an enthusiastic, organised and detail-oriented individual to join our production team. If you are looking to progress your career in manufacturing and supply chain and you enjoy working in an interesting, challenging and rewarding environment, please apply now or get in touch with recruitment@geotogether.com to find out more.

Our Business

geo is the leading supplier of in-home displays to the UK Smart Metering programme and has deployed +6 million units to date. The company aims is to create a sustainable future where every household is able to manage its overall consumption and carbon footprint, without even having to think about it. A recipient of the Queen's Award for Innovation, **geo** combines its smart energy display, control and automation capabilities with leading edge data science, AI, cloud, firmware, UX, UI and customer insight.

The Position

The production team at **geo** is all about supporting the development of products and shipping them into millions of people's homes. Our new production engineer would be involved in managing shipments, production planning, and supporting our overseas manufacturing facility. You will need to have technical experience in a similar role, with a background in business or engineering. Key responsibilities include:

- Working with our overseas CEM(s) to design and apply production line efficiencies and optimisation
- Automation of our overseas production line
- New Product Introduction team to put next generation product into high volume production
- Bill of materials and configuration control
- ECN generation
- Mechanical and tooling design work to feed to DFM. Critical to quality part definitions and assessments for reliability
- Programming of samples and different types of certificates for all products using production tools
- Update via OTA of products for commercial for customer samples and customer setup
- Firmware testing for release prior to going to the factory
- Quality and Control plans for each product to ensure repeatability of manufacture
- Supporting the ISO9001 and ISO14001 business processes
- Maturing the production process and process control such as FMEA, PPAP and APQP

- Lead auditor for procurement from suppliers.
- ISO external supplier audits of key suppliers
- Implement production continuous improvement processes including requirement imposed on the business by customers including but not limited to monitoring reject rates, rework, vendor performance and on time delivery
- Selecting, ordering and purchasing materials, including “new supplier acceptance”

Requirements

- A good degree (or equivalent) in Engineering, Science or Business Management
- Six Sigma qualified is preferable
- Suitable experience of high-volume electronic product manufacture using overseas suppliers
- Strong written and verbal communication skills
- Desire to develop a career in manufacturing and supply chain
- Enthusiastic and organised with a strong eye for attention to detail
- Microsoft Office proficient, particularly MS Excel
- Import/Export experience is desirable

Applications

To apply for this position please email your CV and Cover Letter together with your salary expectations and availability to our people team at recruitment@geotogether.com
