

Python Test Developer

All experience levels considered (0-10 years)

£ competitive salary | flexible working | 25 days annual leave | 5% company pension | private medical insurance | life assurance cover | blended home and office working | employee assistance programme | paid volunteer leave | regular social and wellbeing events and much more |

We are looking for a talented Python Test Developer to join our team. If you enjoy working as part of a small and dynamic team, where you would benefit from exposure to all aspects of software and hardware system test / validation then this could be the role for you. The position would be ideal for a candidate who has a good understanding of test fundamentals and wishes to work within an innovative company with an expanding product range. Please apply now or get in touch with recruitment@geotogether.com to find out more.

*Please note this role is currently 100% remote until coronavirus restrictions ease.

Our Business

geo aims to create a sustainable future where every household can manage its overall consumption and carbon footprint, without even having to think about it. In addition to providing management systems and data analysis for solar, EV and home heating, the company is the leading supplier of in-home displays to the UK Smart Metering programme and has deployed +6 million units to date. A recipient of the Queen's Award for Innovation, **geo** combines its smart energy displays, control and automation capabilities with leading edge data science, AI, cloud, firmware, UX, UI and customer insight to create complete carbon management systems.

The Position

Key responsibilities, depending on seniority, include:

- Development of python test infrastructure in **geo**'s unified test environment
- Analysing functional specifications, defining and coding of automated tests for those specifications
- Definition and execution of release test plans, test representation in product release processes
- Ensuring appropriate system test coverage for a product or feature, maximising automation where possible

geo | 3 St. Mary's Court | Main Street | Hardwick | Cambridge | CB23 7QS | UK

Green Energy Options Ltd. is registered in England. Company number: 5783558. VAT Registration: UK 896 6052 79

Requirements

Depending on experience, you will have proven experience in object oriented software development, ideally in python for test automation applications and be able to demonstrate expertise in the majority of the below:

- Experience in software and hardware system test / validation
- Proven ability to transform requirements into effective test plans & automated tests
- Strong OO scripting skills, ideally in python
- A good degree in a relevant subject or demonstrably excellent technical skills & knowledge
- Proven ability to work effectively in an agile team at all phases of product development
- Enthusiastic self-starter with good attention to detail
- Interest in consumer IoT, cloud and app solutions

Applications

To apply for this position please email your CV and Cover Letter together with your salary expectations and availability to our People Team at recruitment@geotogether.com
